

Suhani Chug

B.E. Computer Science Engineering, Chitkara University, Himachal Pradesh
suhanichug4@gmail.com — LinkedIn — LeetCode — GitHub

Education

Chitkara University

2024 – 2028

Computer Science and Engineering student with a strong foundation in programming, Data Structures, and Object-Oriented Programming. Currently learning and building full-stack web development projects. Passionate about problem-solving and eager to apply technical skills in real-world software development.

Professional Summary

Computer Science Engineering student skilled in Java, C++, Python, and full-stack web development. Experienced in building MERN stack applications and machine learning-based projects with strong knowledge of Data Structures, Algorithms, and Object-Oriented Programming. Passionate about solving real-world problems and developing scalable software solutions.

Technical Skills

Programming Languages: C, C++, Java, Python, JavaScript

Web Technologies: HTML5, CSS3, React.js, React Router, Vite, Node.js, Express.js, RESTful APIs

Databases: MongoDB, SQL

Developer Tools: Git, GitHub, Docker, AWS Basics, Postman

Concepts: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, SDLC, Agile, Scrum, CI/CD Structures & Algorithms, OOP, DBMS, Operating Systems

Projects

HealthGuard

- Implemented Random Forest, SVM, Decision Tree, and Naive Bayes models, achieving 96% prediction accuracy on healthcare datasets.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction reliability.

To-Do List Application

- Developed a console-based task management system using C++.
- Implemented task creation, deletion, and completion tracking features.

Zomato MERN Clone (Reels-Based App)

- Built a full-stack food discovery application using MERN stack (MongoDB, Express.js, React.js, Node.js).
- Developed RESTful APIs and integrated frontend-backend communication with responsive UI components.

Professional Experience

Deloitte Data Analytics Job Simulation (Forage)

Apr 2026

- Completed a virtual job simulation focused on Data Analytics and Forensic Technology.
- Analyzed datasets and applied problem-solving techniques to generate business insights.
- Developed understanding of data analysis workflows and real-world consulting scenarios.

- Regularly practice Data Structures and Algorithms problems.
- Active problem solver on LeetCode.
- Strong understanding of arrays, recursion, sorting and searching algorithms.

Certifications & Achievements

- Deloitte Data Analytics Job Simulation (Forage) — Completed practical tasks in Data Analysis and Forensic Technology.
- Solved 150+ Data Structures and Algorithms problems on LeetCode.
- Achieved 100/100 marks in AI Rudiments academic course.
- Infosys Springboard Certifications in Programming and Technology domains.
- Achieved 100/100 marks in AI Rudiments academic course.
- Participated in Viksit Bharat Young Leaders Dialogue (VBYLD).

Strengths

- Strong problem-solving and analytical thinking
- Quick learner with adaptability to new technologies
- Good teamwork and communication skills
- Passionate about software development and continuous learning
